AUNT MARY'S SWEET CORN

We offer this grandest and sweetest of all Sweet Corn on the market.

Never was sweet corn that tasted as sweet. It will stay in good condition for table use for two or three weeks. It stays in milk so long that natural ripening is impossible; ears that were ready for table use in October were still in milk when hard frost killed the plants in November.

BY ALL MEANS GIVE THIS SWEET CORN A TRIAL THIS YEAR AND YOU WILL COME BACK FOR MORE NEXT YEAR. Make your first planting during May two weeks apart; make another one the second week in June, another the last week in June, and the last planting the first week in July, and this will furnish you sweet green ears until early October.

We have had splendid reports from customers who planted seed in June and July having fresh corn for Thanksgiving. Per pkt. 25c; 3 for 70c; 1/2 lb. 80c; 1 lb. \$1.50.
